OPERATING NOTES

❄ Cold start

Free instance sleeps after ~15 min idle; first hit ~50s, then cached.

💾 Durability

R2 is the source of truth; local disk is a rebuildable cache.

🌱 Seeding

Always use `scripts/seed_r2.py` (round-trip verified; OneDrive-safe).

🌿 .xlsm quirk

Backslash-zip sheets auto-normalized on read (Linux/openpyxl fix).
